#### **INTERNAL MOUNT**

#### 750 SERIES DOUBLE

# **SNUBBER ASSEMBLY – PARTS**

INDEXATOR REPLACEMENT -	GV11S	AV11S	GV12S	AV12S
	GV14S	AV14S	GV15S	GV17S

#### PATENTED - U.S.

- U.S. No. 6,264,013 - Canada No. 2,257,056
- Sweden No. 521,177
- Finland No. 116,136
- Other patents pending

Snubber

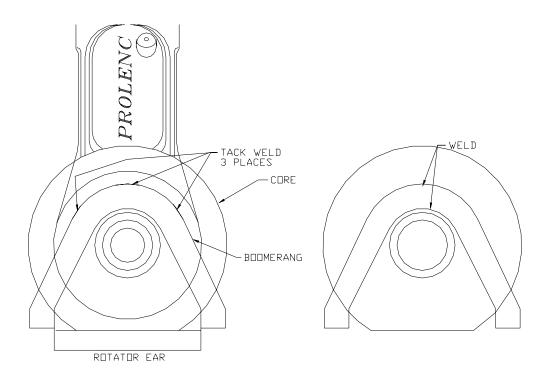

# **INTERNAL MOUNT**

750 SERIES DOUBLE

#### MOUNTING AND OPERATIONAL INSTRUCTIONS

## **ROTATE YOKE MOUNT**

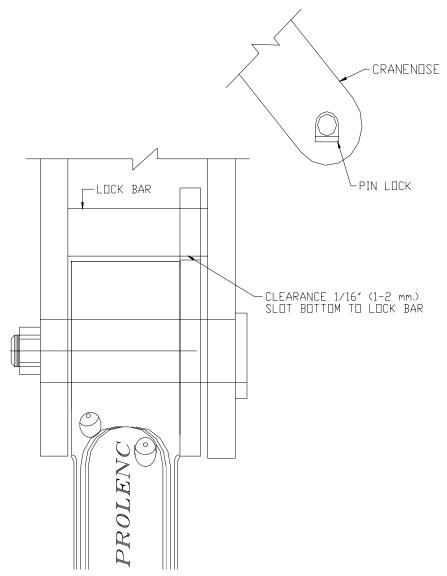

- Install link, core & pin into rotator. Place boomerang over rotator ear, tight fit required. To spread ears, grind or Zip cut <sup>3</sup>/<sub>4</sub> thru center of boomerang inside and bend ears out. To close boomerang ears, grind or Zip cut <sup>3</sup>/<sub>4</sub> thru centre of boomerang outside and bend ears in. Tack weld boomerang to core. Remove core and weld boomerang to core, inside and outside.
- 2) Pack bearing with grease.
- Grease friction sleeve, B3T-865 (zinc) only. B3T-760 (composite) to be dry fit, for maximum component life, a tight fit core to rotator top is necessary, build-up if required. Install concave side of spring-washer towards core, insert link assembly between ears of rotator.
- 4) Grease pin and install with the headed end of pin mating with original pin lock on rotator.
- 5) Lubricate tension collar, inside and out with never seeze install collar and nut.

## **CRANE NOSE MOUNT**

- 1) Install link into crane in same manner as rotate yoke mount. For crane nose width larger than 100 mm. Install spacers provided and weld spacers to crane nose after installation.
- Rotate core in crane nose to engage original lock plate. Core lock provided if required. Trim to length and weld into position. Minimum 1/16" (2 mm) – clearance required, lock plate to slot bottom as noted below.
- 3) Pin lock on crane nose may need to be moved to opposite side dependant upon rotator position.

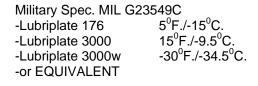

# **INTERNAL MOUNT**

750 SERIES DOUBLE

# MOUNTING AND OPERATIONAL INSTRUCTIONS

# SERVICE AND ADJUSTMENT

- 4) To adjust, tighten nut against tension collar.
- 5) Composite sleeve B3T-760 maintenance free **lightly** adjust for first 1/2 hour to "run-in" sleeve – then adjust to desired attachment control.
- 6) **Maximum adjustment** of nut is **3/4 turn** after nut has contacted tension collar.
- 7) Grease zinc sleeve, B3T-865 every **10 hours**.
- 8) Greases with 5% 6% MOLY are recommended:

BUSHING ZERK BUSHING ZERK

\*\*\*\*Load must be maintained on core at all times to avoid damage to core or link\*\*\*\*

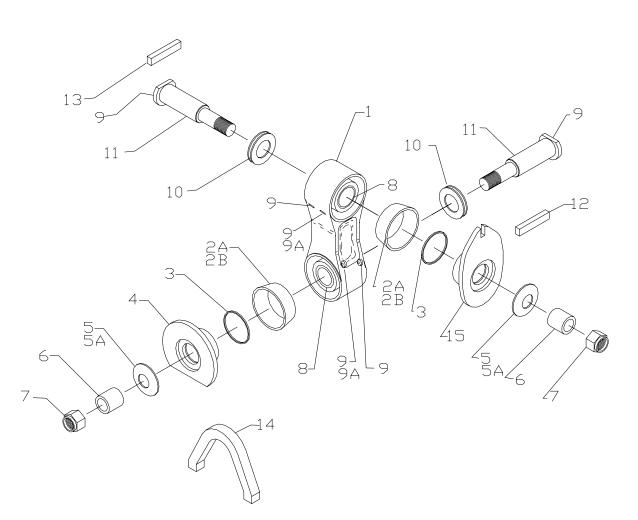

#### CAUTION:

Only tension snubber to maintain adequate control of attachment, dependant upon application and attachment weight. Over tensioning of snubber reduces friction sleeve life.

# INTERNAL MOUNT B3750

6 3/4" (170 mm.) O.D. CRANENOSE USE WITH INDEXATOR ROTATORS AV11S, GV11S, AV12S, GV12S, GV15S, GV104S, AV14S, GV14S & GV17S

## INTERNAL MOUNT B3750

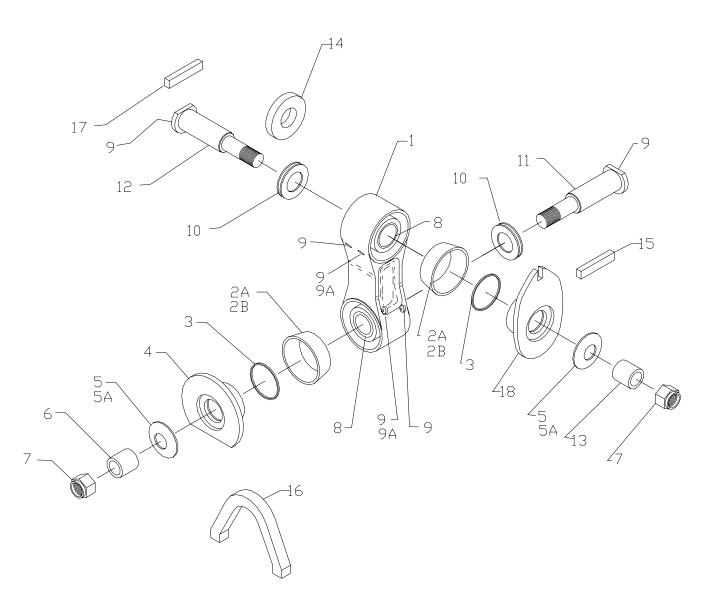

#### 6 3/4" (170 mm.) O.D. CRANENOSE USE WITH INDEXATOR ROTATORS AV11S, GV11S, AV12S, GV12S, GV15S, GV104S, AV14S, GV14S & GV17S
